

ReachNG Closer Addendum

This addendum supplements the [Master Service Agreement](#) and the [Data Processing Agreement](#) where the Client has subscribed to the **ReachNG Closer** suite (real-estate inbound lead handling).

1. Scope of Closer

The Closer suite:

- Captures inbound real-estate enquiries via WhatsApp, web form, and email forwarder.
- AI-classifies each new message and drafts the next outbound reply.
- Queues every draft in the Client's HITL inbox for explicit approval.
- Tracks lead stage progression (new → qualifying → ready → booked / lost / stalled).
- Hands over qualified leads to the Client with budget + timeline + objections summarised.

2. Lead ownership

- Each lead generated through Closer is the **exclusive property of the Client**.
- ReachNG does not share, resell, or use lead data for any other Client.
- ReachNG does not contact a Client's leads on behalf of any third party.
- Aggregated, de-identified statistics across the platform may be used by ReachNG for product improvement (in line with MSA §6).

3. Client's Closer-specific obligations

The Client shall:

- Maintain a current and accurate **Closer Brief** (or BusinessBrief covering Closer fields) — product list, ICP, qualifying questions, red flags, never-say list, closing action.
- Approve, edit, or skip every draft in the HITL queue. **Drafts auto-expire after 72 hours** if no action is taken.
- Comply with **Lagos Tenancy Law** when issuing chase / quit notices through the Platform.
- Honour every opt-out within 24 hours of receipt.
- Not use the Closer suite to broker properties for which it does not have a documented mandate from the principal.

[LAWYER REVIEW] — confirm Lagos Tenancy Law alignment of any chase / quit-notice wording produced by the platform.

4. AI drafting and HITL responsibility

- Every outbound message is drafted by Claude (Anthropic) using the Client's BusinessBrief context.
- **No outbound message is sent without explicit Client approval** in the HITL queue.
- The Client bears final responsibility for the content of any approved message that is sent from its WhatsApp number, irrespective of whether the original draft was AI-generated.

- ReachNG warrants the technical fidelity of the drafting and queueing pipeline; ReachNG does NOT warrant the substantive accuracy of any specific AI-drafted message and the Client must read each draft before approving.

5. Compliance with WhatsApp policies

The Client acknowledges that:

- The platform sends messages from the Client's own WhatsApp number paired through Unipile.
- Meta enforces opt-out, throttling, and content rules; suspension of the Client's number is a Meta decision and outside ReachNG's control.
- ReachNG enforces protective rate-limits and warm-up caps to reduce suspension risk; the Client may not bypass these.

6. Sender warm-up

For new accounts, ReachNG enforces a **7-day warm-up window** during which daily send caps are reduced (typically: days 0-2 = 50/day, days 3-6 = 100/day, day 7+ = configured cap). The Client may not request the warm-up be lifted before day 7.

7. Pricing (real estate)

As set out in the Order Form. Default Closer pricing structure (where the Order Form is silent):

- One-time setup fee
- Monthly retainer
- Per-qualified-viewing fee, OR commission on closed deals (luxury tier)

[LAWYER REVIEW] — confirm whether commission-based pricing requires any additional licensing under Lagos real-estate / agency rules.

8. Termination consequences

On termination of the MSA:

- The Client retains full ownership of all leads in its Closer pipeline.
- ReachNG provides a one-time CSV export of all leads, threads, and stage history at no charge.
- ReachNG hard-deletes Closer data within 30 days of export confirmation, save where retention is required by law.

9. Order of precedence

Where any conflict arises between this Addendum and the MSA, this Addendum prevails on Closer-specific matters.
