

ReachNG — Legal Pack (Lawyer Review)

Five documents drafted ready for lawyer review. Every clause needing legal verification is marked **[LAWYER REVIEW]** so the lawyer can spot what to focus on.

File	Purpose	Signed by	Reads in this order
<u>ORDER_FORM.md</u>	The "front page of the deal" — tier, fees, start date, signatories	Every client	1
<u>MSA.md</u>	Master Service Agreement — the umbrella contract	Every client	2
<u>DPA.md</u>	Data Processing Agreement — GDPR-compliant	Every client	3
<u>MUTUAL_NDA.md</u>	Two-way confidentiality	Every client	4
<u>CLOSER_ADDENDUM.md</u>	Lead ownership + HITL responsibility	Real-estate Closer clients only	5 (if applicable)

Regenerating PDFs

Run `python -m legal.build_pdfs` from the repo root. Requires `reportlab>=4.0.0` (already declared in `requirements.txt`). Output lands in `legal/pdfs/`.

Briefing notes for the lawyer

- **NDPR registration** — can your firm file with NITDA, or should we DIY? Filing fee is ~**20K**.
- **DPO appointment** — required only when we cross 10K records processed; please confirm the threshold and language.
- **Liability cap** — drafted as 12 months of fees paid. Is that market for Lagos SaaS?
- **Lagos Tenancy Law alignment** — Closer Addendum mentions quit-notice language for rent chase. Please confirm the 7-day final ultimatum wording is current.
- **Forum** — drafted as Lagos High Court. Switch to arbitration (LCA / LMDC) if you prefer.
- **AI-specific carve-outs** — we draft messages with Claude (Anthropic), every outbound is human-approved before send. The DPA should reflect that processing.

What we are / aren't (one-pager for the lawyer)

- **What we are:** ReachNG is an agentic employee for Nigerian SMEs. Clients feed the agent their own leads (inbound WhatsApp/IG/web enquiries, BYO contact lists, referrals) and the agent runs the conversation — drafts replies, qualifies, follows up, closes. After a deal is signed, the same agent handles ongoing operational work (rent chase, payroll, invoice reminders, KYC). Every outbound message is human-approved before it sends and is delivered from the client's own WhatsApp number, not ours. We do not prospect on behalf of our clients.

- **What we are not:** not a lender, not a payments provider, not a custodian of client funds, not a CRM. We process PII on behalf of our clients (data processor, not controller).
- **Sub-processors:** Anthropic (AI drafting), Unipile (WhatsApp gateway), MongoDB Atlas (storage), Railway (hosting).
- **PII categories:** full name, phone, email, address.
- **Geography:** Nigeria-first; data may transit AWS regions (Cape Town / Frankfurt) via sub-processors.

How to use these drafts

- Lawyer reviews and inserts changes against **[LAWYER REVIEW]** markers.
- We accept the redlines and produce a final.
- PDFs generated via Pandoc or any markdown-to-PDF converter for signature.
- Counter-signed copies stored in Mongo against the `clients` document (`legal_pack` field) for audit.
